DETAILED ACTION

1. This office action is in response to a Decision By the Patent Board of Appeals and Interferences decided on March 24,2008.

Allowable Subject Matter

2. Claims 1-4, 8, 10-15, 17-21, 23, 26, 30-35, 39, 41-43, 46 and 49-51 are allowed.

3. The following is a the examiner's statement of reasons for the indication of allowable subject matter as stated by the Board of Patent Appeals and Interferences' decision: The claims are allowable because:

Re. claim 1, Hawkins is the closest prior art to Applicant's invention found by the examiner. Hawkins et al. (US Patent 6,247,000 B1, hereafter Hawkins) discloses a method for reconciliation of fund manager and custodian account records, comprising: receiving a first account record by a database electronically from one of an internal portfolio tracking system of a fund manager and a custody network of a custodian and receiving a second account record by the database from the other of the internal portfolio tracking system of the fund manager and the custody network,of the custodian; automatically comparing the account records by a computer application according to the predefined matching rules for at least one item of account data selected from a group of account data items consisting of account number, security identification units, unit cost, total cost, unit price, and total market value to identify one of matched and unmatched first and second account records; and if unmatched account records are identified in the comparison, generating a report of the comparison by the computer application identifying the unmatched account records accessible for display by the fund manager and the custodian, allowing a manual match of the unmatched account records on the database by either one of the fund manager and the custodian, and storing an historical record of the manual match by the computer application accessible by either one of the other of the fund manager and the custodian.

Art Unit: 3691

Hawkins does not disclose or suggest: allowing the fund manager and the custodian to predefine matching rules for the respective account records independently of one another.

Re. claim 35, Hawkins is the closest prior art to Applicant's invention found by the examiner. Hawkins discloses a system for reconciliation of fund manager and custodian account records, comprising: a computer database adapted for receiving a first account record electronically from one of an internal portfolio tracking system of a fund manager and a custody network of a custodian and for receiving a second account record from the other of the internal portfolio tracking system of the fund manager and the custody network of the custodian; a computer application preprogrammed for automatically comparing the received account records according to matching rules for at least one item of account data selected from a group of account data items consisting of account number, security identification, units, unit cost, total cost, unit price, and total market value to identify one of matched and unmatched first and second account records; and wherein if unmatched account records are identified in the comparison, the computer application is further preprogrammed for generating a report of the comparison identifying the unmatched account records accessible for display by the fund manager and the custodian, for allowing a manual match of the unmatched account records on the database by either one of the fund manager and the custodian, and for storing an historical record of the manual match accessible by either one of the other of the fund manager and the custodian.

Hawkins does not disclose or suggest: allowing the fund manager and the custodian to predefine matching rules for the respective account records independently of one another. For these reasons claims 1 and 35 are deemed allowable over the prior art and claims 2-4, 8, 10, 11-15, 17-21, 23, 26, and 30-34 and claims 39, 41-43, 46, and 49-51 are allowable by way of dependency on allowed independent claims 1 and 35 respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
